Smart Payment Solutions

ACCOUNTABLE

Our Smart Card system offers total accountability- every transaction is tracked in real-time.

ADAPTABLE

Enjoy complete vend pricing flexibility and the ability to easily change prices- anytime, anywhere.

EFFICIENT

Simplify collections, automate reports, and easily view machine analytics.

FLEXIBLE

Customers can purchase or add value to Smart Cards using cash, credit or mobile pay.

It's easy.

It's easy for the customer. It's easy for the route operator. Our Smart Card solutions streamline the laundry process for everyone. Instead of wasting time searching for change, customers can easily purchase or add value to a smart card using cash, credit/debit card or mobile pay. Route operators no longer have to count coins or fix jams, saving time while enjoying increased revenue from float and breakage. Prices can be set anytime, anywhere and analytics are just a few taps away with our tablet app.

The benefits pile up.

Greenwald has long led the laundry industry in Smart Card technology, and for good reason. You will enjoy a heap of benefits from our Smart Card system- proven reliability, high-security designs to minimize potential vandalism, and brand customization- just to name a few.

Manage your business anywhere, anytime.

Our Smart Card system is not only a payment solution, it's also a business assistant. Our back office software, Greenwald Management System, allows route operators to easily manage their businesses with real-time tracking and robust reporting capabilities.

- Set-up machines and locations
- Easily set vend pricing
- Track all revenue, spending detail and refunds
- Real-time traceability of each unique smart card
- Robust reporting capabilities

SMART CARDS AND KEY FOBS

Our durable Smart Cards are available in two options: contact chip or contactless. Tap-and-go fobs are also available for the contactless system. Each card has a unique ID for easy traceability. Custom printing promotes your brand.

SMART PHONE APP

Customers can pay for laundry, start machines, check availability and track progress- all from one app! The app is available for iOS and Android. It uses the same readers as contactless cards, allowing for more customer options without additional maintenance.

CARD KIOSKS

Our recently updated multi-lingual, EMV and PCI compliant kiosks accept cash or credit/debit/mobile pay. Customers can purchase a new card or add value to an existing card. The touch screen display is easy to use and the high-security design minimizes any potential vandalism. Our PinMate system allows customers to add funds, even during network downtime.

CARD READERS

Our reliable card readers validate available funds and instantly deduct the vend price to start a machine. Readers are designed to fit most major brands. Enjoy easy set-up and configuration, as well as vend pricing flexibility.
